

Content Review Compliance Handbook

For EdTech Company

Subject: Expert Review Reports for Grade 7-9 Science Content

Purpose

This handbook outlines the strict requirements for expert review reports assessing Grade 7-9 Science content. Compliance with these requirements ensures that our educational materials meet high academic standards.

Expert Review Report Requirements

1. **DATE**

The report must include the date of the review in the format DD/MM/YYYY. This ensures clarity on the timeliness of the review.

2. **IDENTITY**

The full name of the expert, their institution (affiliation), and Contract ID must be provided. This information verifies the expert's credentials and association.

3. **SUBJECT**

The report must specify the subject of the content being reviewed: Physics, Chemistry, Biology, or Math. This categorization aids in organizing and assessing subject-specific materials.

4. **CORRECTIONS**

A detailed list of specific mistakes or inconsistencies found in the AI-generated content must be included. Each identified error should be clearly articulated to facilitate understanding and rectification.

5. **REFERENCES**

A list of specific textbooks or scientific sources used to verify the corrections must be provided. This ensures that the reviewer's assessments are grounded in credible educational resources.

6. **RECOMMENDATIONS**

Clear pedagogical advice for improving the content for students should be included. Recommendations should focus on enhancing clarity, engagement, and educational value.

Conclusion

Adhering to these requirements will enhance the quality of our educational materials and support our commitment to delivering accurate and effective learning experiences for students. All experts are expected to follow this handbook diligently.
